Patient \_\_\_\_\_ Procedure \_\_\_\_\_

**\*\*\*NOTE: Pre-Anesthesia testing is not optional if your pet is 7 yrs. Or older\*\*\***

Your pet is scheduled for a procedure that requires anesthesia. We would like to take this opportunity to recommend Pre-Anesthesia testing and explain why it is important to the health of your pet.

Before placing your pet under anesthesia, a veterinarian will perform a complete physical external examination to identify any existing medical conditions that could complicate the procedure and compromise the health of your pet.

Because there is always the possibility a physical exam alone will not identify all of your pet's health problems, we strongly recommend that a pre-anesthesia profile be performed.

It is important to understand that a pre-anesthesia profile does not guarantee the absence of anesthetic complications. It may, however, greatly reduce the risk of complications as well as identify medical conditions that could require medical treatment now or in the future.

***PLEASE NOTE:*** *If any fleas/ticks are observed on your pet(s) while at our clinic, he/she will receive a flea/tick treatment at the owner's expense. \_\_\_\_\_ (please initial)*

**\*\*THE COST OF PRE-ANESTHESIA TESTING WILL BE\*\***  
**\*\*AN ADDITIONAL \$93.00**

*(Please sign below in the appropriate space to accept or decline blood work)*

? I ACCEPT recommended Pre-anesthesia testing

ACCEPT x \_\_\_\_\_

-OR-

? I DECLINE the recommended pre-anesthesia tests at this time and request you proceed

with anesthesia. I understand that a medical condition may exist which would be impossible to identify during a physical exam alone. I understand that my pet's health could be at risk if such a condition goes undetected when my pet is placed under anesthesia.

DECLINE x \_\_\_\_\_

\*The price of a Dental Propy is \$174.05

*\*Dental Prophy with blood work is \$267.05*

*\*Please note that additional charges will apply if the veterinarian finds that extractions are necessary.*
